PROFILE

Full Stack Developer with 2+ years of professional experience building e-commerce platforms, custom Shopify applications, and performance-focused websites. Currently building a React + Django Shopify app for jewelry dropshipping at A&I Inc. (USA), with production work across Shopify/Liquid, AWS, and Docker. Combines engineering with analytics and SEO to ship features that measurably improve engagement and conversions.

EXPERIENCE

A&I Inc. — USA · Remote
Full Stack Developer — Jul 2025 – Present

- Building a custom Shopify application for personalized jewelry dropshipping and e-commerce automation.
- Developed the React frontend on top of Django REST APIs with a modular, scalable architecture.
- Implemented JWT authentication and own deployments on AWS using Docker and GitHub Actions CI/CD.

React · Django · Shopify APIs · JWT · Docker · AWS · GitHub Actions

Guyal India — Mumbai, India
Full Stack Developer — Feb 2025 – Jul 2025
Full Stack Developer Intern — Aug 2024 – Jan 2025

- Built and launched the company's Shopify store (guyal.com), customizing themes with Liquid, HTML, CSS, and JavaScript.
- Automated product workflows (uploads, updates, inventory adjustments), cutting repetitive manual work.
- Integrated Google Analytics, Meta Pixel, and Microsoft Clarity; ran UI/UX audits and shipped data-driven design updates to lift engagement and conversions.
- Built custom Magento 2 modules in PHP and JavaScript and contributed to responsive frontend work with Bootstrap.

Shopify · Liquid · JavaScript · PHP · Magento 2 · Google Analytics

Freelance — Remote
Web Developer — Jun 2023 – Present

- Deliver websites and e-commerce stores for restaurants, fashion brands, and agencies, from design to deployment.
- Focus on responsive UI, technical SEO, and analytics so clients can track and grow their traffic.

React · Django · Shopify · SEO
